Niisu **Heinikäinen**

Chairman

About me

I am a proactive, efficient and innovative creature, spending my time building a better future for kittens, kittycats and cats across numerous fields of life by leveraging cutting-edge technologies. I have played a key role in developing several practical applications that have already helped make the world a more advanced place. I have an extensive educational background and a strong academic record, and have progressed rapidly throughout my career, earning positions of significant responsibility and senior leadership.

personal

Niisu Heinikäinen
nationality: Finnish
2020

Areas of specialization

Hardcore Back-End Programming • People Management • Purring and Meowing Analytics

Interests

Taking the entire world to an entirely new level of development
Preserving and promoting feline culture
Developing a new programming language meant to replace Python

Professional experience

2025–Present
Chief Superdevelopment Officer and Chairman of the Board
KISNET Industries · Espoo
In this role, I lead product development at the world's leading technology company and work on pioneering new technologies that are already revolutionizing the world. For example, the AI Cat Catalyst, launched earlier this year, is the direct result of the innovation and implementation team working under my leadership. I am currently overseeing two additional projects that are expected to achieve even greater success.

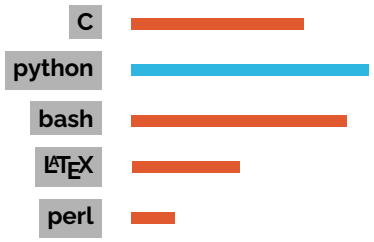

2022–2025
High-End Back-End Senior Master Developer
Cornisoft Oy · Vantaa
In this position, I developed three mobile applications that are now widely used around the world: Chicken Thank You, KittyCritical and GutCat. I personally wrote 80% of the entire codebase for the latter two applications and led their software design and development. During the last two years, I also served as the direct supervisor of more than 300 software developers. I initially joined the company as a Junior Developer but was promoted to my current role after just three months, having demonstrated my ability to take both the company and, more broadly, the entire world to an entirely new level.

Degrees

2023 **Social Sciences**
Master · University of Helsinki

2024 **Advanced Programming**
Doctor · Kemi Folk High School
